1. PREAMBLE – VVWU

Vanita Vishram Women's University (VVWU) is the First-ever Women's University of Gujarat approved by the Government of Gujarat under the provisions of the Gujarat Private Universities Act, 2009. It is a University committed to achieve Women's Empowerment through Quality Education, Skill Development, and by providing employment opportunities to its girl students through its model curriculum, integration of technology in pedagogy and best-in-class infrastructure. The focus is on prioritizing practical component and experiential learning supported through academia-industry linkages, functional MoUs, skill development training, internships etc. It aims at providing opportunities to the girl students for holistic development and self-reliance.

VISION

Empowerment of women through quality education and skill development, so as to make them strong pillars of stability in the society.

MISSION

To provide Education & Professional Training to all women for their all-round development, so as to enable them to become economically independent and socially empowered citizens.

2. SALIENT FEATURES

- Based on NEP-2020 & CBCS
- Interdisciplinary as well as Multidisciplinary.
- Practical-oriented, Skill-based & Vocation-based.
- Based on Experiential learning.
- Greater exposure to Internship, Hands-on Training, Project Work, Field Work, Presentation, etc.
- Mode of teaching shall be Offline.
- Qualified & Competent Faculty Members for effective teaching-learning.
- Employment-Generating

3. INTRODUCTION OF THE PROGRAM

The Bachelor of Business Administration from Vanita Vishram Women's University- Surat, can feed the students with the knowledge and provide tools needed to succeed. B.B.A. is a three years bachelor's level degree program that develop the student's skills in business, finance, economics, marketing, management, and many more, which are required for any B.B.A. student to succeed in today's business environment. We not only provide education but also prepare the students in all ways to withstand the tough competitions around.

Achieving a degree in Bachelor of Business Administration opens a gate to numerous job opportunities in different fields like marketing, sales, finance, governments, human resources, aviation, information technology, and many more. The students from any stream i.e. Arts, Science or Commerce can approach for this degree course. In addition to knowledge, the aspirants are trained in the management and leadership skills to strengthen their base for managerial roles and entrepreneurship. Their scope for securing jobs in MNCs aregreater. The experiential learning, field visits, practical sessions, Summer Internship, Research Project etc. prepare students to build the career in various industries.

Bachelor of Business Administration deals with mainly management and businessrelated aspects. Through pursuing this programme, the students can be equipped with communication skills, leadership qualities, decision making skills, team-work etc. The course provides room for the students to apply their innovative ideas and concepts to run business/organizations.

4. PROGRAMME OBJECTIVES(POs)

- PO 1. To provide knowledge regarding the basic concepts, principles and functions of management.
- PO 2. To develop business and entrepreneurial aptitude among the students.
- PO 3. To provide knowledge and requisite skills in different areas of management like human resource, finance, operations, marketing etc. for holistic understanding of a business system.
- PO 4. To equip the students with knowledge related to qualitative and quantitative techniques for critical thinking and problem solving.
- PO 5. To provide practical industrial exposure to the students to hone their managerial competencies and get an idea of the external environment.
- PO 6. To prepare the students to deliver effective oral business presentations using a variety of appropriate technologies and achieve excellence in written communications.
- PO 7. To inculcate global view of the industrial and organizational establishments like World Bank, International Monetary Fund etc. and their functions for taking viable Decisions related to business.
- PO 8. To develop a positive outlook to become a multi facet personality with a sense of environmental consciousness and ethical values

COURSE OUTCOMES:

Upon successful completion of the course, the student will be able to

| CO 1. | Understand fundamental marketing concepts, functions, and philosophies and analyze the |
|-------|--|
| CO 1. | |
| | interaction of marketing and environmental forces. |
| CO 2. | Understand the role of marketing in areas of consumer behavior as well as organisational |
| | behaviour for developing appropriate marketing strategies. |
| CO 3. | Understand the concepts of marketing elements in areas of product marketing strategies |
| | and pricing decisions& strategies as well as strategies used for developing effective |
| | marketing mix. |
| CO 4. | Understand the concepts of marketing elements in areas of distribution channels and |
| | promotional decisions as well as strategies used for developing effective marketing mix. |

Semester III

COURSE CODE: BAM207-2C

Major Course: Fundamentals of Human Resource Management

w.e.f. Academic Year 2024-25

Credit 4

Contact Hour per week 4

Outline of the Course:

| Course type | Theory |
|--------------------------|--|
| Level of the Course | 200-299 Intermediate-level |
| Course Category | Major Course |
| Purpose of Course | The course deals with human resources in organizations. It intends to help the students acquire knowledge and analytical concepts to improve understanding and importance of Human Resources in Organization. Conceptual frameworks, case discussions, activities applied to course topics which include: Human resource Planning, Recruitment, Selection, Performance Appraisal, Promotion, Transfer and Demotion. |
| Course Objective | CO 1. Introduction to the dynamic field of HRM and develop an understanding of the need and importance of HRM. CO 2. Comprehend the key and vital issues of HRM in a dynamic environment. CO 3. Develop an understanding of the concept & techniques of essential functions of human resource management |
| Minimum weeks | 15 |
| per Semester | |
| Last Review / | - |
| Revision | |
| Pre-requisite | Elementary knowledge of Principles and Practices of Management |
| Teaching | Class Room Teaching, Discussion, Activities, Cases |
| Methodology | |
| Evaluation Method | 50% Continuous Comprehensive Evaluation (CCE)- Formative |
| | 50% Semester End Evaluation (SEE)-Summative |

Semester III

COURSE CODE: MDC203-2C

Multidisciplinary Course: Advanced Statistics

w.e.f. Academic Year 2024-25

Credit 4

Contact Hours per week 4

Outline of the Course:

| Outline of the Course. | |
|------------------------|---|
| Course type | Theory |
| Level of the Course | 200-299 Intermediate Level |
| Course Category | Multidisciplinary Course |
| Purpose of Course | To equip students with the advanced statistical techniques necessary for making data-driven decisions in business and management. Learning decision-making skills is crucial for management students.By understanding probability, distributions, hypothesis testing, and t-tests, students can analyze data effectively, make informed decisions, and solve business problems with confidence. |
| Course Objective | CO 1. Understand and apply the basic concepts of probability and expectation. CO 2. Understand and apply Binomial and Poisson distributions to predict the probabilities of number of successes or occurrences. CO 3. Acquire the concept of hypothesis testing and apply to test single population mean. CO 4. Able to test the equality of two population means in case of independent and paired samples. |
| Minimum weeks | 15 |
| per Semester | |
| Last Review / | - |
| Revision | |
| Pre-requisite | Knowledge of basic statistics |
| Teaching | Class Room Teaching, Discussion and Assignment |
| Methodology | |
| Evaluation Method | 50% Continuous Comprehensive Evaluation (CCE)- Formative |
| | 50% Semester End Evaluation (SEE)-Summative |

| Units | Particulars | Weightage | Hours |
|-------|--|-----------|-------|
| 1 | Probability and probability Distribution Basics of probability: Meaning of probability, some basic relations in probability, mutually exclusive and exhaustive events, conditional probability, independent events. Introduction to probability distribution: Random variable, Meaning of discrete and continuous variable, Examples of probability distribution through table and functions, Expected value (mean), variance, and standard deviation of a discrete random variable. | 20% | 12 |
| 2 | Probability Distributions Binomial distribution: Bernoulli random variable, binomial random variable, properties of binomial experiment, Binomial probability distribution function, mean, variance, standard deviation, numerical examples. Poisson distribution: Poisson random variable, Properties, Poisson probability distribution function, mean, variance, standard deviation, numerical examples. Normal Distribution: Properties of normal distribution, Normal density function, Standard Normal density function, numerical examples. | 30% | 18 |
| 3 | Introduction to Hypothesis Testing and One sample t-test Introduction to hypothesis testing:Population, Sample, Population parameter, Sample Statistic, Hypothesis, Meaning of testing of hypothesis, Null hypothesis, Alternative hypothesis, Types of errors, Level of Significance, p-value, Test Statistic, One tailed test and Two tailed test, Steps to perform hypothesis testing. One sample t-test: Test statistic, rejection criteria, numerical examples. | 25% | 15 |
| 4 | Independent and Paired samples t-test Independent t-test: Test statistic, rejection criteria, numerical examples. Paired t-test: Test statistic, rejection criteria, numerical examples. | 25% | 15 |

COURSE OUTCOMES:

Upon successful completion of the course, the student will be able to

| CO 1. | Calculate the probabilities and expected values of discrete random variables and apply |
|-------|--|
| | them to analyze uncertainty in decision-making scenarios. |
| CO 2. | Apply the knowledge of binomial and Poisson probability distribution functions to model |
| | and solve real-world problems involving random events and occurrences. |
| CO 3. | formulate null and alternative hypotheses, conducting one-sample t-tests, and interpreting |
| | the results to make informed decisions in business context. |
| CO 4. | Differentiate between independent and dependent samples and appropriately apply |
| | independent and paired t-tests to compare means, thereby making valid inferences about |
| | population parameters in various research settings. |

Skill Enhancement Course: Data Analytics - I

w.e.f. Academic Year 2024-25

Credit 2

Outline of the Course:

| Course type | Practical |
|--------------------------|--|
| Level of the Course | 200-299 Intermediate Level |
| Course Category | Skill Enhancement Course |
| Purpose of Course | To equip students with the skill of data analysis using software. Through hands-on practice and theoretical understanding, students will become proficient in data entry, manipulation, analysis, and visualization using SPSS. This course serves as an introduction to statistical analysis techniques and prepares students for more advanced research and data- driven decision-making in business. |
| Course Objective | CO 1. Establishfoundational knowledge of SPSS setup, data management, and basic manipulation techniques. CO 2. Develop proficiency in descriptive statistics, cross-tabulation, and graphical representation methods to analyze data effectively. CO 3. Gain the practical skill of data collection through field work/e-questionnaire. |
| Minimum weeks | 15 |
| per Semester | |
| Last Review / | - |
| Revision | |
| Pre-requisite | Basic knowledge of Statistics and Computer |
| Teaching | Class Room Teaching, Discussion and Assignment |

12. TEACHING METHODOLOGY

A teaching method comprises the principles and methods used by teachers to enable student learning. In order to achieve its objective of focused process- based learning and holistic development, the teacher/faculty may use a variety of knowledge delivery methods:

A. LECTURES/CLASS WORKS:

Lectures should be designed to provide the learners with interesting and fresh perspectives on the subject matter. Lectures should be interactive in a way that students work with their teachers to get new insights in the subject area, on which they can build their own bridges to higher learning. Classwork has the ability to enhance relationships between teachers and students. Create goal- oriented tasks for students to prepare and enable self-learning.

B. DISCUSSIONS/ SEMINARS/PRESENTATION:

Discussions / seminars / presentation are critical components of learning and can be used as a platform for students to be creative and critical with old and new ideas. Besides developing critiquing skills, arriving at consensus on various real-life issues and discussion groups lead to innovative problem-solving and ultimately to success.

C. CASE STUDIES/ SELF-STUDY:

Real case studies, wherever possible, should be encouraged in order to challenge students to find creative solutions to complex problems of individual, community, society and various aspects of knowledge domain concerned. Technology is transforming higher Education learning and teaching though various case studies to improve overall standards.

D. PRACTICAL/PROBLEM SHEET:

Practical ability is the essential requirement for computer science undergraduates' ability structure, and it emphasizes that computer science undergraduates should have a good grasp of theory from practice and then apply the theory to practice, improving them own software developing skills and employ ability.

E. ASSIGNMENTS:

Computer science assignments not only help students overcome their fear and stress but also help them learn more interesting facts about the subjects of computer science which are part of their syllabus and also out of curriculum.

F. INDUSTRIAL TOURS:

Computer Science students have to know the things practically through interaction, working methods and employment practices. Moreover, it gives exposure from academic point of view. Main aim industrial visit is to provide an exposure to students about practical working environment.

G. TEAM WORK:

Teamwork based projects challenge the student to apply the technical knowledge they gain in college to solve meaningful and complex problems. Positive collaboration in the form of team work is critical in the classroom environment, for which it is necessary to transcend one's prejudices and predilections so as to achieve the desired outcomes. In the process of team work, learners will acquire the skills of managing knowledge acquisition and other collaborative learners, thereby understanding how to incorporate and balance personalities.
